

INDUSTRIAL ELECTRONICS
Pictures and Layout of Current Inventory For Sale

December 31, 2018

Dear Prospective Buyer,

Thank you for your interest in viewing pictures of the inventory for sale.

This inventory is being offered to industry leaders interested in purchasing the whole lot at a significantly discounted price.

If you are interested, please contact us directly, at **404-351-6340**, or send email to: nch3@acksupply.com. No agents or brokers, please.

Below, please find pictures of the parts shelves and isle-ways housing the inventory.

We desire to sell the parts in the bin boxes, in the metal shelves, which will be shrink-wrapped for transporting to the buyer's location.

The shelving layout, as shown in the pictures requires 2000 square feet of floor space, with a height of eight feet.

The up-to-date inventory spreadsheet, which is also downloadable, is 290 pages and is in alphabetical order by manufacturer, description, and by part number. We are well stocked with New Old Stock (NOS) hard to find inventory going back years.

The items for sale include thousands of semiconductors, resistors, audio and RF connectors, relays, enclosures, panel meters, rack panels, power supplies, hand tools, soldering irons and iron parts, transformers, potentiometers, switches, rheostats, connector-adaptors, LED's, capacitors, Jones plugs and sockets, speakers, barrier strips, fuses, fuse holders, audio transformers, alligator clips, insulators, Variacs, contactors, Molex connectors, and much more.

All of us at Ack, including the family who previously owned it for decades, would like to express sincere appreciation for the loyal patronage over the past 72 years.

Please direct further inquiries regarding the discounted purchase price or any other questions to me directly.

Again, I thank you for your time and interest.

A handwritten signature in black ink that reads "Cole Harrison".

N. Cole Harrison, III
